You may add a separate drawing of the physical space of the classroom if you like. These questions are just a guideline - feel free to elaborate as you wish.

#4 Please answer the question below that pertains to you:

For Returning Staff Only:

Every returning staff member is a leader. What would you do differently that would be helpful for the program and what do you think are the most important things you can as a leader this summer?

For New Staff Only:

Creative Personal Statement: On a separate sheet of paper or any other media, express an aspect of your personality that this application has not yet addressed. Your expression can take any form you like – art, poetry, charts, math, stories, photographs, song lyrics, etc. This is your chance to give us a better understanding of you as an individual and the unique qualities you can bring to the program. Be creative!

Designing Your Course

In this part of the application, you will describe the course that you may teach this summer. Please consider the following when designing your course.

- You will teach your course to classes of eight to ten students (ages 13 to 15) for five weeks.
- Your students are English language learners, with varying levels and abilities. They also have had little opportunity to practice speaking English.
- Summerbridge helps students learn English and build their confidence in speaking English. Therefore, you and your students must speak in English at all times. Your class must be taught entirely in English and you cannot speak or write in Chinese, even if they do not understand a word, definition, or concept. You will need to think of creative and alternative ways to explain things.
- You should choose a subject that you enjoy and feel comfortable teaching. The subject should promote interactive activities, hands-on projects, and English language development. It can be a subject you learned in school or elsewhere. Remember, you only have five weeks, so consider a specific subject. Also, think about the relevance of your subject to students in Hong Kong.
- Here are some examples of past courses: Journalism, Entrepreneurship, Aviation, Drama, Comic Book Making, World Cultures, Astronomy, City Building, Economics, and Debate.

Please answer the questions below about the course that you want to teach this summer. Feel free to attach additional sheets if necessary.

1. What subject will you teach this summer? List at least three topics and a final project that you might cover for this subject.

Example
Subject:
Astronomy
Topic 1:
Study of the solar system
Topic 2:
Space travel
Topic 3:
Learning about the possibility of alien life forms
Final Project:
Create a travel guide to a fictional space colony

My Class

Topic 2:

Topic 3:

Final Project:

2. Why have you chosen this subject? You should feel passionate about the subject you choose. What experience do you have in this subject area?

Designing Your Course (continued)

3. As you noticed in question 1, classes culminate in a final project (lasting two to four classes) which help tie the topics together. Describe two hands-on final projects you could do for this course. Examples include debates, posters/displays, drama presentations, and simulations.

Example of an Astronomy Final Project:

Space Colony Travel Guide – Each student will make a contribution to a travel guidebook. The book will be designed for tourists, and describe life on a far-off space colony on an alien planet. Sections will include details relating to accommodation, transportation to the colony, maps, activities, and local culture.

Final Project 2:

4. Please list any additional subjects you would feel comfortable teaching.

Electives and Sports

A. Electives

Besides academic classes, students also take electives at Summerbridge. Electives are 40-minute classes that offer students an opportunity to learn about and engage in an activity that is new and/or interesting for them. These classes do not need to be academic focused. In previous years, electives have included Beatboxing, Foreign Languages, Storytelling, Acapella Singing, and Jewelry Making. You will be co-teaching an elective with other teachers, and you will get a chance to discuss with other teachers and finalize the elective you will teach during Teacher Orientation. Please list two electives you might be interested in teaching and write a sentence or two explaining them. Please note that these are simply ideas for us to get a better sense of what electives you might like to teach.

Teaching Presentation Section (For Local Applicants Only)

Now that you've successfully completed the application, you can now begin preparing for the teaching presentation. **You do not need to submit the teaching presentation section with the application**, but you will have to bring it along with you to the teaching presentation. This is extremely important, as **your application will not be considered without this section**. The lesson you propose to teach in this section must be what you teach at the teaching presentation. Please read the following information to help you prepare for the presentation.

For applicants living abroad: You will not do a teaching presentation. We will conduct an online interview. You do not need to fill out this Teaching Presentation Section.

Information on the Teaching Presentation

- The interview should take around 30 minutes. You should prepare a 10-minute teaching presentation, which you will teach during the interview. We will stop you after 10 minutes, and the interview will continue with a 20-minute discussion about your presentation and your interest in joining Summerbridge.
- The lesson plan you develop and teach for the teaching presentation should center around a concept or vocabulary word(s) from the subject that you intend to teach. We want to see a class that addresses the goals of your course and not one filled with icebreaker games. We highly encourage you to use hands-on and interactive activities that would help an English language learner pick up the concept and/or vocabulary word(s) that you're trying to teach.
- The Summerbridge interviewers will be playing the part of Form 2 and 3 (Grade 8/9) Summerbridge student and will act and speak like shy English language learners.
- We will have a whiteboard and a laptop available. If you need anything else, please contact us at least a day beforehand at info@summerbridge.org.hk.

Tips to Prepare for the Presentation

- To gain a better understanding of our students and what it is like to teach in our program, explore the Summerbridge website – summerbridge.org.hk
- To prepare for the discussion, think about the strengths and weaknesses of your lesson plan, why you want to join Summerbridge, and why you are interested in teaching.
- We are not looking for perfect teachers! Think of the presentation as a chance for you to practice teaching and learn how to do it better. We are looking for applicants who try different and creative ways of engaging our students and making their class interesting. Think about a class, a lesson, or a teacher you enjoyed and use some of those techniques in your lesson.

If you have questions or concerns about the presentation, please e-mail us at info@summerbridge.org.hk or call us at (852) 2761-4444.

Creating an Individual Lesson Plan

Summerbridge teachers and professional teachers alike create lesson plans before they teach a class. Why? Because lesson plans help you plan out what you will teach for one class period and how you will teach it. Planning is extremely important if you want to be successful in teaching.

For the teaching presentation, you must create an individual lesson plan for your 10-minute lesson. Please fill out the following questions to help you create your lesson plan. You must bring this section to your teaching presentation. If you are living abroad, you do not need to complete this section.

1. What specific information about your subject will your students gain from this lesson? This is the objective of your lesson.

Example objective for an Astronomy class:

Students will identify the names and positions of the planets in the solar system.

My Class Objective:

2. What materials will you need to teach this lesson? You must always plan ahead when teaching to make sure you remember all of your materials. List them here.

Example Astronomy class materials:

- a) Summaries of planets
- b) Picture of each planet
- c) Beach ball

- d) Bottle of water
- e) Rock
- f) Umbrella

- g) Gloves
- h) Ring
- i) Lemon

My Class Materials:

3. What hands-on teaching methods and activities will you do in class to get your students excited about learning? Students should be involved in activities that will help them learn the objective.

Example Astronomy class activity:

Students break into pairs. Each pair reads brief summaries of two planets, then examines different items at the front. Each pair will choose the two items that best represent the planets they just read about, and explain why to the class. The class will then determine the order of the planets together.

My Class Activity:
